</tr>
<tr>
<td>3:05 pm to 3:45 pm</td>
<td>Open Discussion Forum</td>
</tr>
<tr>
<td></td>
<td>This is an opportunity for people to bring forth ideas, professional practice issues, research opportunities, or case studies. Some recent topics of interest are listed below:</td>
</tr>
</tbody>
</table>

1. COVID-19
   a. Practice Adaptations
      i. How have team clinic structures and processes been modified?
      ii. Challenges with virtual services
      iii. Development of new services to address new needs
   b. Clinical Considerations
      i. Population-specific issues with PPE/masks (speech intelligibility, patients with hearing impairment, etc.)
      ii. School concerns - helping patients and families navigate changes, deciding on virtual vs. in-person learning options, parents working and teaching at home, dealing with uncertainty about the fall
      iii. Anxiety about medical visits/procedures – preop COVID testing, travel to hospitals in urban settings for appointments, concerns about exposure while hospitalized
      iv. Social challenges – lack of in-person socialization opportunities, especially for young children;

2. Billing for patient care
   a. For those who bill and use Health and Behavior codes, how have the changes to HBAI CPT codes this year impacted your practice? Any modifications to your model for screening patients in team clinic settings?
   b. Productivity expectations since COVID – have institutions made adjustments?
   c. Productivity expectations and meeting expectations in an interdisciplinary setting
      i. What strategies/systems are clinicians using to meet these expectations? How long are patients being seen, and what are the documentation demands and tracking of patients (if this is required)?

3. Early intervention services
   a. How much are team MH providers involved in referral, monitoring progress, and helping families navigate educational system when services transition? Are there different levels of involvement for different groups/diagnoses?

4. Models of care for team clinic and use of screening measures
   a. Are MH providers seeing all patients in team clinic, or are only some patients seen? If the latter, how are providers deciding who to see?
   b. If screening measures are being used, what’s the threshold for warranting an in-person MH provider assessment/reassessment? Do screening measures seem to be accurately identifying patients/families who need more direct follow-up?

5. Special programming with MH involvement

a. Any new programs, workshops, family activities, etc. being offered within the last year? New ideas?
Code of Conduct

It is important to remember that these forums are intended to give participants an opportunity to connect with others and to discuss new and engaging topics. Polite dispute is part of what challenges current thinking and advances patient care. Please follow the below general guidelines.

- Understand that the discussions and comments are meant to stimulate conversation not to create contention.
- Respect all participants and their right to an opinion.
- Actively listen to all other discussion participants.
- Stay within suggested time limits for responses. The moderators are responsible for ensuring everyone has a chance to participate.
- State concisely and clearly your question or comment so others can respond appropriately.
- Respect the privacy of patients and families when discussing a specific case.
- Do not cause annoyance, inconvenience or needless anxiety or include materials or language likely to upset, embarrass, alarm or annoy any other person.
- Do not promote discrimination based on race, sex, religion, nationality, disability, sexual orientation or age.
- Use caution when discussing products and suggested uses.
- Do not use defamatory, abusive, profane, threatening, offensive, harassing, violent or illegal materials or language.
